Summary

Data-focused Business Analyst with hands-on experience in **Python (Pandas)**, **SQL (PostgreSQL)**, and **BI tools (Power BI, Google Looker Studio)**. Skilled in **EDA**, **ETL pipelines**, and **dashboard development** for business decision-making. Seeking a **Data Analyst** role to drive insight-led strategies.

Education

VIT Bhopal University <i>B.Tech in Computer Science (Specialization in Cyber Security & Digital Forensics)</i>	2023 – 2027
Shree Sanatan Dharm Education Center <i>Class XII – Senior Secondary Education</i>	2022 – 2023

Skills

Languages: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)
Databases: PostgreSQL, MySQL, SQL (Window Functions, CTEs, Advanced Joins)
Visualization: Power BI, Google Looker Studio, Microsoft Excel, Google Sheets
Techniques: EDA, ETL, Data Cleaning, Data Wrangling, Statistical Analysis, KPI Reporting
Tools: Jupyter Notebook, Git, GitHub, pgAdmin, VS Code

Experience

Business Analyst Intern - Laneway Certificate <i>Remote / India</i>	March 2026 – June 2026
- Performed end-to-end data cleaning and preprocessing on 6 datasets, resolving inconsistencies ; conducted EDA using descriptive statistics and distribution plots to surface 5+ actionable patterns in data quality and structure. - Built 4+ interactive marketing dashboards in Google Looker Studio and Power BI, tracking 10+ KPIs and reducing manual reporting time by 40%. - Wrote 15+ optimised PostgreSQL queries to extract and transform data, delivering actionable insights across 3 business functions including lead quality, channel performance, and conversion behaviour. - Engineered and executed ETL pipelines processing 6+ datasets to prepare clean, structured data for ML model training, reducing data preparation time by 30%. - Collaborated with 2 cross-functional stakeholders to translate business requirements into dashboards, shifting focus from vanity metrics to 5 actionable KPIs.	

Projects

SME Lending Risk & Portfolio Performance Analytics View Project	January 2026
- Analyzed a portfolio of over 2 million loans, calculating default rate by filtering to final loan outcomes. - Performed statistical risk segmentation across 7 loan grades and 13 purposes, identifying high-leverage segments. - Conducted cohort analysis on monthly issuance data (2007–2018) and built a Power BI dashboard for KPI visualization.	
Customer Churn Analysis View Project	October 2025
- Identified top 5 churn predictors from 45+ attributes and built a model with 82% accuracy and 85% precision. - Applied K-Means clustering to segment customers into 4 behavioral groups for targeted retention analysis. - Projected a 20% potential reduction in monthly churn through model-driven retention strategies.	

Certifications

- Google IT Support Professional Certificate** [Certificate]
- AWS Technical Essentials** [Certificate]
- Tata - Data Visualisation: Empowering Business with Effective Insights** [Certificate]
- Deloitte Australia - Data Analytics Job Simulation** [Certificate]
- Accenture North America - Data Analytics & Visualization Job Simulation** [Certificate]

Achievements & Extra-Curricular

- Winner - VIT Bhopal Datafest 2024:** Secured **1st place** out of **25+ teams** in a **6-hour** data analytics hackathon, developing a predictive model that outperformed all others in accuracy and business insight.
- Co-Lead - IoS Club, VIT Bhopal:** Led planning and execution of technical workshops, activities, and peer-learning initiatives for the student club.
